## What is TOOLS for n Version2?

TOOLS for n Version2 consists of two software components: Yamaha Steinberg FW Driver and n Extension. Yamaha Steinberg FW Driver enables audio/MIDI signals to be transferred between a computer and the n8/n12 via IEEE1394 cables. Using n Extension, you can link the n8/n12 with Cubase versions that support the Link functions between both of them. The TOOLS for n Version2 Installer installs these two software components.

TOOLS for n Version2 requires the following software components.

n8/n12 firmware	V1.03 or later
IEEE1394 firmware	V1.07 or later
Sweet Spot Data Manager	V2.0.0 or later

For details on Cubase versions that support the Link functions, refer to the release notes.
